Delete all API

1. Each account can create up to 30 API Keys.
2. Do not disclose your API Key, Secret Key (HMAC) or Private Key ( RSA) to anyone to avoid asset losses. You should treat your API Key and your Secret Key (HMAC) or Private Key ( RSA) like your passwords.
3. It is recommended to restrict access to trusted IPs only to increase your account security.
4. You will not be able to create an API Key if KYC is not completed.

☒ By checking this box, all existing API Key(s) on your master account and sub-accounts will be subject to Default Security Controls.

Choose API Key type

System generated

Works using HMAC symmetric encryption. An API Key and Secret Key will be provided to you. Please keep these keys secure and treat it like your password. Do not share the keys with any third parties.

Self-generated

Works using Ed25519 or RSA asymmetric encryption. An API Key will be provided to you and you will have to create your own public-private key pair via software (for example: [Binance Key Generator](#)), and provide the public key to Binance. Please keep the API Key and Private Key secure and treat it like your password. Do not share the API Key or Private Key with any third parties.
